Informed Consent Form — Video Recording

Driver Drowsiness & Distraction Detection Dataset | University of Sharjah

You are invited to take part in a senior design and research project on driver drowsiness/distraction detection, led by Oumar Ibrahim (U22200741) at the University of Sharjah, supervised by Dr. Mohamad Khairi Bin Ishak. Please read this form and sign below if you agree to participate.

What participation involves

- Video recording of approximately 10 minutes, seated in a vehicle, performing normal, drowsy, and distracted actions on request, filmed with a smartphone camera.

Use of your data

- Recordings will be used to train and test our detection model and may later support a conference paper (typically IEEE format).

Storage, withdrawal & contact

- Videos are stored on a Google Drive, accessible only to the project team. Participation is voluntary and involves minimal risk; no compensation is provided. You may withdraw and request deletion any time. Contact: U22200741@sharjah.ac.ae

Confirmation:

☐ I consent to identifiable frames/clips of me being included in internal model training, research paper, conference presentation, and/or public dataset release.

☐ I am above 18 years of age

☐ I have read and understood this form and voluntarily agree to take part as described.
